### **DETAILED ACTION**

## Response to Amendment

This communication is responsive to Amendment D, filed 07/11/2005.

Claims 1-33 are pending in this application. Claims 1, 11, 21, 31, 32, and 33 are independent claims. In the Amendment D, claims 31, 32, and 33 were amended. This action is made Final.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- Considering objective evidence present in the application indicating obviousness or nonobviousness.

Application/Control Number: 09/784,593

Art Unit: 2174

Claims 31-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over MindTerm Terminal v1.1.5 (Screen Shots) in view of Network Services Guide for UNIX Users.

In regards to claim 31, MindTerm teaches a method in a computer system, said method comprising the steps of: graphically presenting native Java applications within said computer system utilizing a Java-based graphical user interface (i.e. Figure 1, the MindTerm termianal). MindTerm does not specifically teach graphically presenting native UNIX applications within said computer system utilizing said Java-based graphical user interface, wherein Java applications and UNIX applications are presented by said computer system utilizing the same Java-based graphical user interface. Network Services Guide teaches, "First, use the Telnet program [i.e. terminal window] to login your host computer. If the message "You have mail." is displayed on the screen when you log on a UNIX system, that means there are mail messages stored in the system spool area. These messages may be new or unopened mail, or those which have been read. For reading mail, you can run the pine program. Pine is an interactive screen-oriented mailer program on UNIX systems for computer network users to send and receive e-mail messages and files. You can invoke this software by typing the command pine at the shell prompt" (Page 4, Section 2.6). It would have been obvious to one of ordinary skill in the art to modify MindTerm and allow for UNIX application to execute on the Java-based terminal window with the motivation to provide the user with a portable (i.e. Java-based) terminal window that can be accessed from any computer with an internet connection and execute UNIX applications.

Art Unit: 2174

Claims 32 and 33 are in the same context as claim 31; therefore they are rejected under similar rationale.

# Allowable Subject Matter

Claims 1 –30 are allowed.

Claims 1-30 are deemed allowable over prior art because the prior art does not teach a method in a computer system wherein the window manager is a communication channel between the native UNIX applications and the Java desktop.

## Response to Arguments

Applicant's arguments with respect to claims 31-33 have been considered but are moot in view of the new ground(s) of rejection.

### Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Boris Pesin whose telephone number is (571) 272-4070. The examiner can normally be reached on Monday-Friday except every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine Kincaid can be reached on (571) 272-4063. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
